

MAGNA DENTAL
CARE OF APPLIANCES
(DENTURES & PARTIALS)
(REVISED 4-5-2016)

*CLEAN DAILY. USE A DENTURE BRUSH OR SOFT TOOTHBRUSH AND ALLOW THEM TO SOAK OVERNIGHT IN A DENTURE CLEANSING SOLUTION. THIS WILL HELP PREVENT PLAQUE BUILD UP AND ODOR.

*RINSE AND BRUSH IN CLEAN, WARM WATER WITH DENTURE BRUSH OR SOFT TOOTH BRUSH.

*DO NOT BRUSH TOO HARD OR USE TOOTHPASTE TO AVOID DAMAGING GASKETS, PLASTIC OR METAL PARTS. ABRASION OR SCRATCHING THE SURFACE OF THE DENTURE WILL CAUSE STAINING AND ODOR.

*BRUSH YOUR GUMS, TONGUE AND NATURAL REMAINING TEETH WITH A FLUORIDE TOOTHPASTE, BEFORE REINSERTING DENTURE. THIS WILL HELP STIMILUATE CIRCULATION IN YOUR MOUTH, AND HELP MAINTAIN GOOD ORAL HEALTH.

*AFTER BRUSHING, RINSE WITH MOUTHWASH.

*NEVER TRY TO ADJUST THE FIT OF YOUR DENTURE. THIS CAN CAUSE HARM TO YOUR MOUTH, OR DAMAGE TO THE DENTURE.

*MAKE APPOINTMENTS FOR EITHER DOCTOR TO LOOK AT YOUR ORAL GUM TISSUE FOR LESIONS AS WELL AS LOOK AT THE OVER WEAR OF YOUR DENTURE AT LEAST ONCE A YEAR, MORE OFTEN IF YOU HAVE TEETH STILL PRESENT.

*TO REMOVE DENTURE: YOU ARE SIMPLY UNLOCKING THE SUCTION CREATED BY DENTURES IN THE MOUTH. FOR REMOVING UPPER DENTURE-USE 2 INDEX FINGERS TO BREAK THE SEAL AT THE THE TOP OF THE PINK ACRYLIC OVER THE CANINES OR MOLARS. FOR REMOVING LOWER DENTURE-SLOWLY PULL ON YOUR DENTURE WHILE APPLYING A ROCKING MOTION. PLEASE ASK EITHER DR. KEITH OR DR. MEGAN TO SHOW YOU THE CORRECT WAY OF REMOVING.

*ALWAYS STORE DENTURES IN DENTURE CONTAINER/TUB WITH DENTURE SOAKING SOLUTION, CLEANER, OR WATER TO KEEP THEM MOIST. FAILURE TO KEEP THEM MOIST WILL DRY THEM OUT AND LOSE THEIR SHAPE. NEVER PLACE THEM IN HOT WATER, THIS CAN CAUSE THEM TO WARP.

*IF YOUR DENTURE HAS METAL ATTACHMENT, TALK TO ONE OF THE DOCTORS ABOUT HOW IT SHOULD BE CARED FOR. PLACING THIS PARTICULAR DENTURE IN WATER CAN CAUSE THE METAL PIECES TO TARNISH.

*REMOVE DENTURE NIGHTLY FOR TISSUE TO REST.

*WARNING-PETS LOVE TO EAT DENTURES.

*IF YOUR DENTURE HAS A SOFT LINER, DO NOT SOAK IN DENTURE CLEANER OVERNIGHT. THIS WILL CAUSE THE LINER TO DETERIORATE QUICKLY. SOAK IN COOL WATER.

*FOR PARTIALS, DO NOT BITE IN TO PLACE. YOU COULD WARP OR BREAK THE PARTIAL, SO IT WILL NOT FIT CORRECTLY. USE TWO HANDS TO INSERT AND TO REMOVE.
